

Lipo-Chromizyme

Chrome ZME

In Brief

What started as a healthy concern for trimming fat has resulted in a society which views dietary fat as an insipid monster. Fat is not bad. It is essential for healthy skin and hair and is a major component in the proper functioning of every bodily system. Without fat, precious energy stores are depleted and metabolism slows to an unhealthy crawl. The problem isn't the fat itself, it's undigested fat.

To avoid fats, many individuals turn to "fat-free" packaged meals which are often high in sugar and salt. The all-too-common over-consumption of sugar can result in mood swings, food cravings, headaches and overeating at the next meal, as well as hypoglycemic or diabetic tendencies.

Lipo-chromizyme effectively addresses the problems caused by dietary fats and refined sugars.

- **Increases** energy by making fat available for use in the system.
- **Not a fat burner** or blocker, but a fat digester which allows the body to use fat stores.
- **Includes** a patented chromium source, proven to support healthy insulin function, minimize mood swings, level out sugar highs and lows, and reduce food cravings.
- **Increases** the body's ability to make lean muscle and burn fat while exercising.
- **Helps** break down undigested fats which, if circulating in the bloodstream, may lead to arteriosclerosis and heart disease.

“ Thanks to
Lipo-chromizyme,

I have more

energy, balance and

a lower body fat percentage

because I am consistently

burning fat for fuel

rather than just storing it.”

~ Gea Johnson
United States Power Lifting Team
Heptathlete Contender 2000 Olympics

Lipo-chromizyme
available in U.S.

90 Capsules
- stock #7003

Chrome ZME
available in CAN

90 Capsules
- stock #6003

Suggested Usage
Take 1-2 capsules
with meals.

Supplement Facts

Serving Size	2 Capsules	
Servings per Container	45	
Amount per	2 capsules	% DV
Chromium (as chromium chelavite)	200 mcg	170%
Lipo-chromizyme Proprietary Blend	280 mg	*
Kelp Algae, Rose Hips, Alfalfa Juice concentrate, Bladderwrack Algae		
CAEDS™ for Lipo-chromizyme	53 mg	*
Amylase, Calcium Chelazome, Protease, Cellulase		
Lipase	200 FCCLU	*
*Daily Value not established.		

Other Ingredients: Cellulose, gelatin, water

Chelated minerals protected under Albion patent 4830716

 Chrome ZME

Up Close

Modern diets are often high in fats and sugars, and many of us pay a high price in health problems because of how we eat. Lipo-chromizyme is superior to any other product on the market in its ability to help the body deal with such problems.

Even with the abundance of nonfat or reduced-fat products on the market, and even though we eat a lower percentage of calories from fat than we did ten years ago, as a population we are fatter. Over 60 million persons in the United States are dangerously overweight. Obesity puts the body's organs under extreme stress. Undigested fats in the bloodstream increase the occurrence of heart disease and arteriosclerosis — diseases which are responsible for the greatest number of deaths annually. In addition, overconsumption of sugar causes mood swings, cravings and headaches, and it can lead to hypoglycemic or diabetic tendencies.

Recognizing the harmful effects of fats, many people have chosen to greatly reduce their fat intake. However, fat is the best source of energy and is essential to the workings of all of the body's systems. The key is simply to make sure that fats are digested.

Unlike the potentially harmful "fat blockers" and "fat burners" on the market, Lipo-chromizyme contains the enzyme lipase to ensure that fat is digested. Lipase breaks fat into fatty acids so that it can be utilized for energy. Lipase is often not present in sufficient amounts in the diet. In many cases, the body's ability to produce lipase has been depleted as a result of excessive fat consumption.

Along with lipase, Lipo-chromizyme supplies the body with chromium. Chromium is vitally important to health, yet many Americans are deficient in this essential trace mineral. Chromium ensures that insulin works efficiently. This is important because insulin helps control hunger; regulates energy, fat burning, and muscle building; governs the utilization of cholesterol; and helps resist disease by stimulating the immune system. Without some chromium, insulin doesn't work at all. Chromium deficiency causes fatigue, excess fat production, and is also a major contributor to heart disease and diabetes.

Many of the more publicized forms of chromium are ineffective. Some, like chromium picolinate, are even unsafe and put undue stress on the already overtaxed liver and gall bladder. Lipo-chromizyme includes Chromium Chelavite™, a highly effective, patented form of chromium. The most powerful chromium on the market, Chromium Chelavite™ is absorbed over 50 percent better than chromium picolinate. Because it is bound with amino acids, Chromium Chelavite™ has none of the harmful waste products created by other forms of chromium. Enzyme transporters included in Lipo-chromizyme further increase the retention of this chromium.

Also included are bladderwrack and kelp, which provide minerals that naturally augment metabolic rates. Alfalfa juice, another ingredient, has extremely high nutritive values, including vitamins A, B1, B6, B12, C, E, K, niacin, pantothenic acid, biotin and folic acid, as well as chlorophyll, a blood cleanser.

Though beneficial, none of these superior ingredients would be as effective without Infinity's CA^eDS™ (Chelate Activated Enzyme Delivery System). CA^eDS™ insures that each ingredient is absorbed and used by your body.

Lipo-chromizyme is the best natural supplement for addressing the problems associated with dietary fats and sugars, and is unequaled in helping to reduce fat stores, retain lean muscle, enhance energy and support healthy insulin function.
